

## Phase 6 – UI Development & Testing (Hospital Management App)

### ◆ Objective

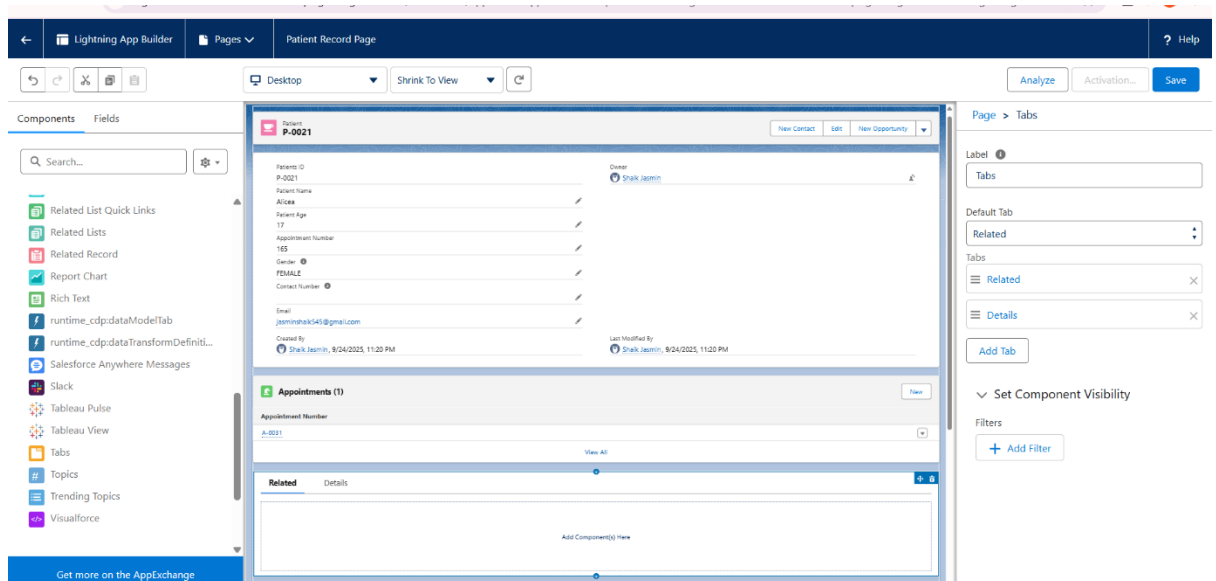

To design user-friendly **Lightning Record Pages**, add **Utility Items**, and test the **Patient → Appointment → Billing flow** in Salesforce.

### ◆ Step 1: Create Lightning Record Pages

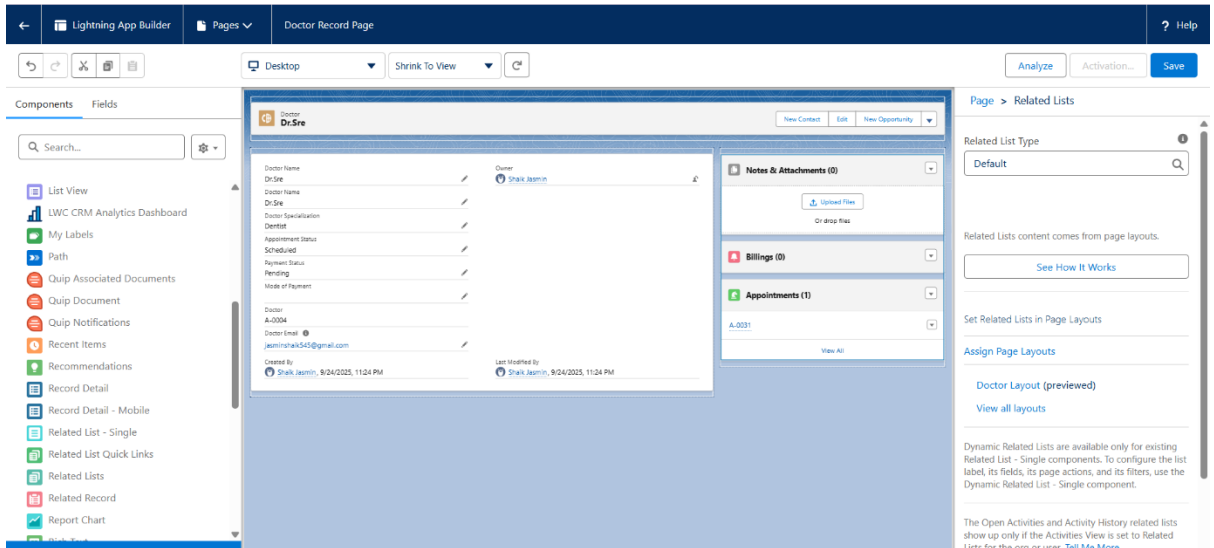

1. Open **Object Manager** → **Select Object (Patient / Doctor / Appointment / Billing)**.
2. Go to **Lightning Record Pages** → **New Page**.
3. Choose template:
  - *Header + Right Sidebar* → for Patients & Doctors.
  - *Two Columns* → for Appointments & Billing.
4. Add components:
  - **Record Detail** → to show fields.
  - **Related Lists** → to show related records (Appointments, Billings, Notes).
5. Save & Assign the page to **App, Record Type, and Profile**.

📸 *Screenshot placement:*

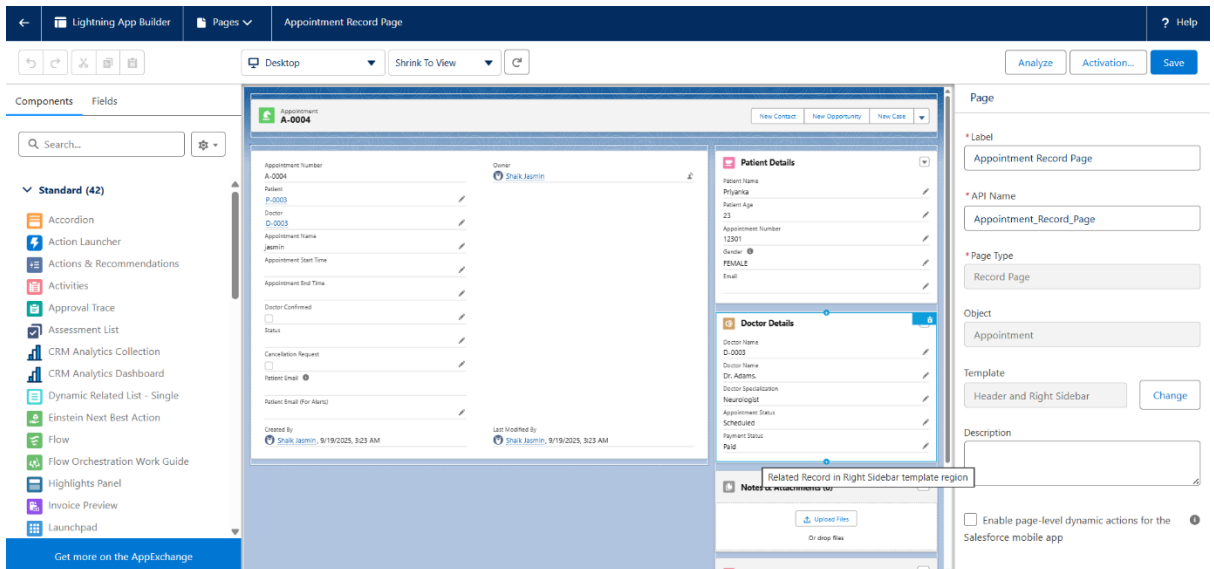

- **Patient Record Page setup.**

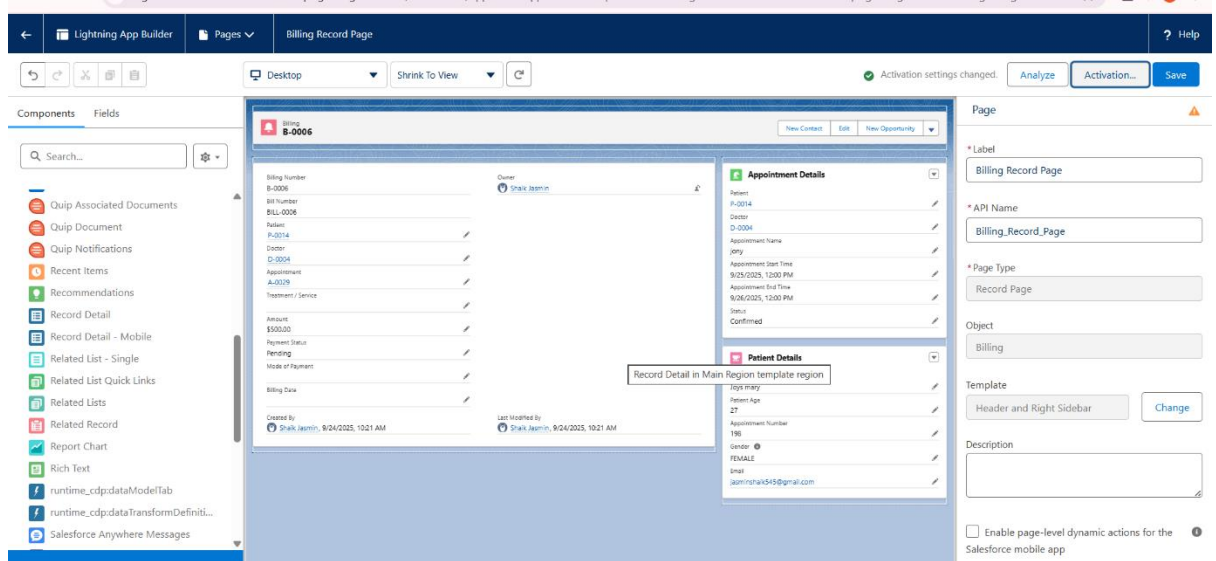

- **Doctor Record Page setup.**

## Appointment Record Page.

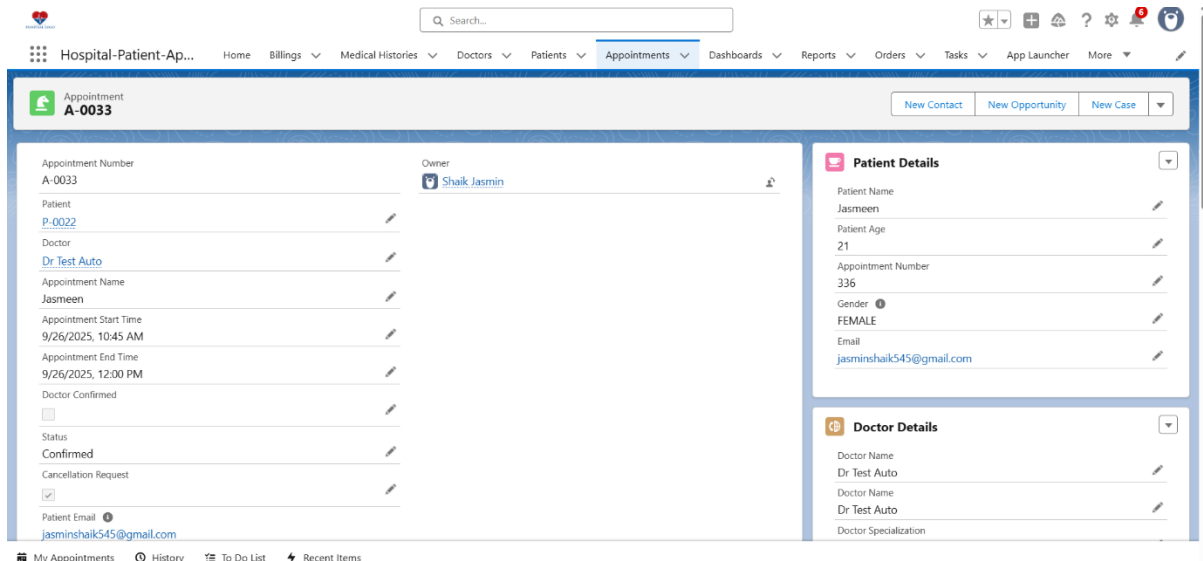

## Billing Record Page.

## ◆ Step 2: Add Lightning Components

- Added **Record Details** to show fields.
- Added **Related Lists** for navigation between Patients → Appointments → Billing.

 *Screenshot placement:*

## ◆ Step 3: Add Utility Items

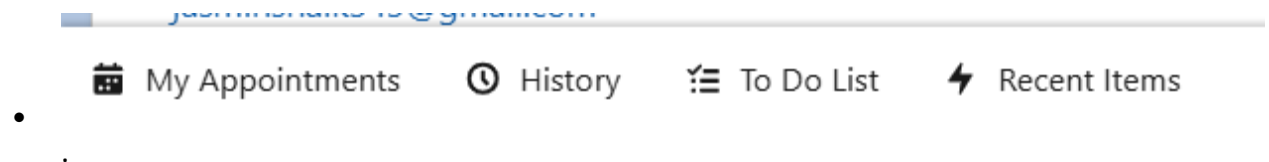

1. Go to **App Manager** → **Edit App (Hospital-Patient-Appointment-Management)**.
2. Open **Utility Items (Desktop Only)**.

3. Add items such as:

- **To Do List**
- **Notes**
- **Recent Items**

4. Save and refresh the app.

 *Screenshot placement:*

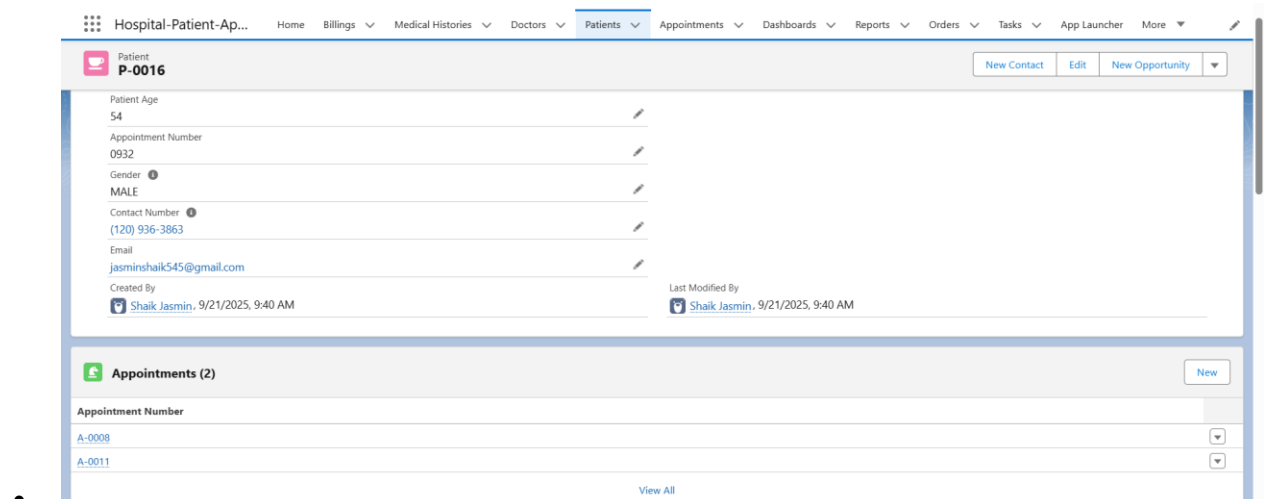

#### ◆ Step 4: Test the UI Flow

1. **Create Patient** → Add patient details.
2. **Create Appointment** → Link to Patient & Doctor.
3. **Create Billing** → Link to Appointment.
4. Verify navigation:
  - Patient → Shows Appointments.
  - Appointment → Shows Patient, Doctor, Billing.
  - Billing → Shows Patient & Appointment.

## ◆ Conclusion

Phase 6 ensures that the **Hospital Management App UI is user-friendly**, data is properly linked across Patients, Doctors, Appointments, and Billings, and navigation between them works smoothly.
